MyNovocure[®]

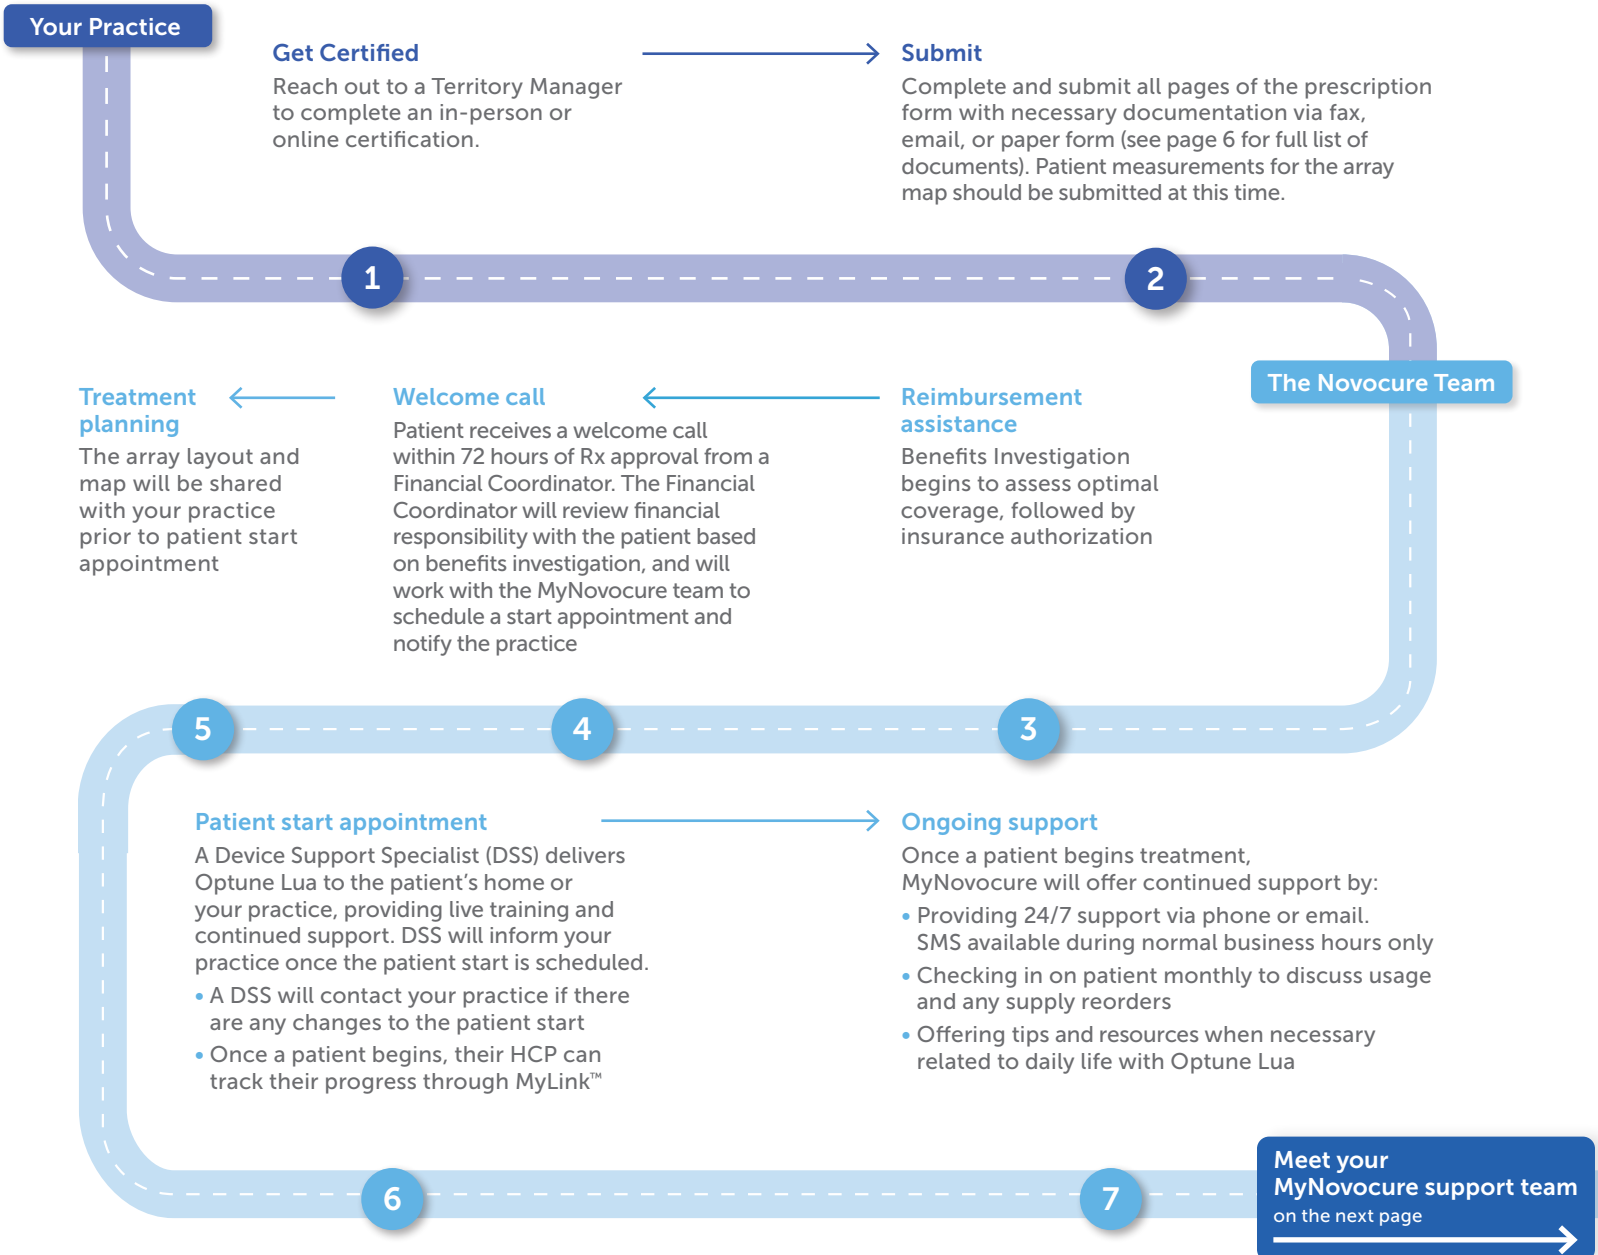

Partnering with your patients and practice at every step of the journey

The MyNovocure program is here to help with points of contact and personalized assistance for your practice and your patients who are prescribed Optune Lua[®]

Offering a comprehensive suite of services designed for support throughout the Optune Lua journey

- ✓ Insurance support and benefits investigation
- ✓ 24/7 live patient support service
- ✓ Training for patients and caregivers
- ✓ Device troubleshooting
- ✓ Reordering supplies
- ✓ Patient support, advocacy information, and incorporating Optune Lua into daily life (or daily routines)

MyNovocure provides resources and education to guide your practice and your patients through each step of the Optune Lua journey

MyNovocure is committed to supporting you

MyNovocure has a dedicated team of experts who are ready to provide live 24/7 support for your patients and your practice throughout treatment on Optune Lua. Learn more about the team below:

Points of contact

Intake Coordinator

- Manages prescription process and supportive documentation

Financial Coordinator

- Works with your patient's insurance plan and identifies resources and programs to minimize the cost for Optune Lua
- Completes welcome calls to prepare patients for Optune Lua treatment initiation

Care Coordinator

- Addresses patient's questions regarding lifestyle adjustments and any other concerns 24/7

Device Support Specialist (DSS)

- Delivers the device to the patient's home or practice, providing in-person training
- Notifies the practice once the patient initiates the device and provides monthly usage data
- Checks in regularly with the patient to discuss usage and provide support during their journey

Nurse Educator

- Executes in-service programs (in or out of office) for med/onc nurses
- Supports HCPs and patients with the Understanding Optune Lua: Patient Education Program, providing additional information about Optune Lua to patients and HCPs

Territory Manager

- Acts as a key point of contact and offers educational support and materials for staying updated on the latest Optune Lua developments

MyNovocure support is available to patients 24/7 by phone and email:
1-855-281-9301 (toll free)

MyNovocure frequently asked questions

What supporting documents should I include as part of the prescription?

Supporting documents needed to process the prescription include:

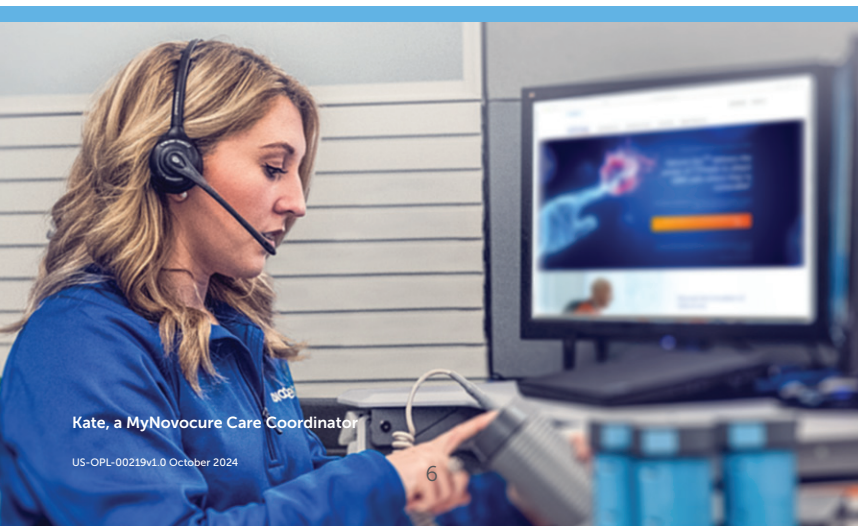

- ✓ copy of patient insurance card
- ✓ medical records (history and physical)
- ✓ clinical notes
- ✓ measurements of torso for arrays

How can I check the status of a prescription submission?

Call us toll-free at 1-855-281-9301.

What do I do if my patient receives unfavorable letters from their insurance company (eg, denial letters)?

Your patient should not be concerned by these documents, as they are commonly sent. MyNovocure will continue to work with your patient's insurance company. Please have your patient contact the Financial Coordinator team regarding specific insurance questions.

Kate, a MyNovocure Care Coordinator

Indication For Use

Optune Lua® is intended as a treatment concurrent with PD-1/PD-L1 inhibitors or docetaxel for adult patients with metastatic non-small cell lung cancer who have progressed on or after a platinum-based regimen.

Important Safety Information

Contraindications

Do not use Optune Lua in patients with an electrical implant. Use of Optune Lua together with electrical implants has not been tested and may lead to malfunctioning of the implanted device.

Do not use Optune Lua in patients known to be sensitive to conductive hydrogels. In this case, skin contact with the gel used with Optune Lua may commonly cause increased redness and itching, and rarely may even lead to severe allergic reactions, such as a fall in blood pressure and breathing difficulty.

Warnings and Precautions

Optune Lua can only be prescribed by a healthcare provider that has completed the required certification training provided by Novocure® (the device manufacturer).

Do not prescribe Optune Lua for patients who are pregnant, whom you think might be pregnant, or who are trying to get pregnant, as the safety and effectiveness of Optune Lua in these populations have not been established.

The most common ($\geq 10\%$) adverse events involving Optune Lua concurrent with PD-1/PD-L1 inhibitors or docetaxel were dermatitis, musculoskeletal pain, fatigue, anemia, dyspnea, nausea, cough, diarrhea, anorexia, pruritus, leukopenia, pneumonia, respiratory tract infection, localized edema, rash, pain, constipation, skin ulcers, and hypokalemia.

Other potential adverse effects associated with the use of Optune Lua include treatment related skin toxicity, allergic reaction to the adhesive or to the gel, overheating of the array leading to pain and/or local skin burns, infections at the site where the arrays make contact with the skin, local warmth and tingling sensation beneath the arrays, medical device site reaction, muscle twitching, and skin breakdown or skin ulcer.

If the patient has an underlying serious skin condition on the chest, evaluate whether this may prevent or temporarily interfere with Optune Lua treatment.

Please see the Optune Lua Instructions For Use (IFU) for complete information regarding the device's indications, contraindications, warnings, and precautions at [OptuneLuaHCP.com](https://www.novocure.com/OptuneLuaHCP.com).

MyNovocure[®]
