

Understanding Optune Gio™: Patient Education Program

Support sessions that provide subject matter expertise about Optune Gio to patients with newly diagnosed or recurrent glioblastoma (GBM)

Scott is an Optune Gio user and Patient Ambassador. Patient image reflects the health status of the patient at the time the photo was taken.

How does the program work?

With the **Understanding Optune Gio: Patient Education Program**, Novocure® representatives provide support and can:

- Answer questions about Optune Gio
- Discuss educational and support resources that Novocure provides
- Discuss the process of starting Optune Gio

Novocure representatives are not acting as Healthcare Professionals. They are trained to serve only as supplementary Optune Gio educators and cannot answer any medical questions.

How to schedule a session

HCP STEPS

1

A healthcare professional (HCP) agrees to participate in the **Understanding Optune Gio: Patient Education Program**, allowing Novocure representatives to conduct one-on-one educational sessions with patients

2

The HCP identifies eligible patients with newly diagnosed or recurrent GBM who may be interested, and forwards patient contact information to a Novocure representative

3

The HCP contacts a Novocure representative to request an educational session for an eligible patient

NOVOCURE REPRESENTATIVE STEPS

4

A Novocure representative schedules a meeting with the patient, either in person, via phone, or virtually

5

The Novocure representative reads a disclaimer before starting the session explaining that they are there to provide support and education and to answer questions about Optune Gio

6

A Novocure representative conducts the program session, either in person, via phone, or virtually. HCP attendance is optional*

*In-person meetings take place in a private area where social distancing guidelines will be implemented; virtual meetings take place over the phone or on video call platforms such as FaceTime® or Zoom.

Please see the complete Important Safety Information for Optune Gio on the back and the Optune Gio Instructions For Use (IFU) for complete information regarding the device's indications, contraindications, warnings, and precautions at [OptuneGio.com/IFU](https://www.OptuneGio.com/IFU)

Indications for Use

Optune Gio™ is intended as a treatment for adult patients (22 years of age or older) with histologically confirmed glioblastoma multiforme (GBM).

Optune Gio with temozolomide is indicated for the treatment of adult patients with newly diagnosed, supratentorial glioblastoma following maximal debulking surgery, and completion of radiation therapy together with concomitant standard of care chemotherapy.

Important Safety Information

Contraindications

Do not use Optune Gio in patients with an active implanted medical device, a skull defect (such as, missing bone with no replacement), or bullet fragments. Use of Optune Gio together with implanted electronic devices has not been tested and may theoretically lead to malfunctioning of the implanted device. Use of Optune Gio together with skull defects or bullet fragments has not been tested and may possibly lead to tissue damage or render Optune Gio ineffective.

Do not use Optune Gio in patients that are known to be sensitive to conductive hydrogels. In this case, skin contact with the gel used with Optune Gio may commonly cause increased redness and itching, and rarely may even lead to severe allergic reactions such as shock and respiratory failure.

Warnings and Precautions

The most common ($\geq 10\%$) adverse events involving Optune Gio in combination with temozolomide were thrombocytopenia, nausea, constipation, vomiting, fatigue, medical device site reaction, headache, convulsions, and depression.

If the patient has an underlying serious skin condition on the scalp (e.g. ulcers, open wound, broken skin) evaluate whether this may prevent or temporarily interfere with Optune Gio treatment.

Use of Optune Gio in patients with an inactive implanted medical device in the brain has not been studied for safety and effectiveness, and use of Optune Gio in these patients could lead to tissue damage or lower the chance of Optune Gio being effective.

Do not prescribe Optune Gio for patients that are pregnant, you think might be pregnant or are trying to get pregnant, as the safety and effectiveness of Optune Gio in these populations have not been established.

Optune Gio can only be prescribed by a healthcare provider that has completed the required certification training provided by Novocure (the device manufacturer).

Please see the Optune Gio Instructions For Use (IFU) for complete information regarding the device's indications, contraindications, warnings, and precautions at [OptuneGio.com/IFU](https://www.optunegio.com/ifu)
